

MICHIGAN ZONING ENABLING ACT (EXCERPT)
Act 110 of 2006

125.3205a Amateur radio service station antenna structures.

Sec. 205a.

(1) 47 CFR 97.15 provides that owners of certain amateur radio service station antenna structures more than 60.96 meters (200 feet) above ground level at the site or located near or at a public use airport must notify the federal aviation administration and register with the federal communications commission as required by 47 CFR part 17.

(2) An amateur radio service station antenna structure may be erected at heights and dimensions sufficient to accommodate amateur radio service communications. Regulation of an amateur radio service station antenna structure by a local unit of government must not preclude amateur radio service communications. Rather, it must reasonably accommodate those communications and must constitute the minimum practicable regulation to accomplish the local unit of government's legitimate purpose.

(3) To obtain information about the regulation of amateur radio service station antenna structures, a person may contact any advisory board that is jointly established by the Michigan section of the American radio relay league and 1 or more state organizations representing local units of government.
