

NATURAL RESOURCES AND ENVIRONMENTAL PROTECTION ACT (EXCERPT)
Act 451 of 1994

324.42706 Islands, enclosures, and pens used for propagation purposes; character and location; construction; conditions to issuance of license or approval of enclosure; purchase of deer from state; applicability of subsections (2) and (3); “flush” or “flushed” defined.

Sec. 42706.

(1) All islands, enclosures, and pens used for propagation purposes shall be of a character and in a location that the department approves as satisfactory to keep in complete and continuous captivity the stock covered by the license, and shall be constructed in a manner to prevent the entrance of wild stock of the same species. However, pinioned or wing-clipped birds may be kept in unroofed enclosures.

(2) After July 1, 1986, the department shall not issue a license to a person, or approve an enclosure or pen capable of enclosing deer, unless the following conditions are met:

(a) The township or city in which the enclosure or pen is to be located has granted authorization for the enclosure or pen to be located within the township or city.

(b) If there are deer within the area to be enclosed, the applicant or license holder flushes that area to eliminate those deer. The applicant or license holder shall submit the proposed method to be used to flush deer from the area to the department for approval.

(3) Any deer that cannot be flushed from the land that is to be enclosed and is covered by a license issued under this part shall be purchased from the state as provided in section 42707.

(4) Subsections (2) and (3) do not apply to a person who has a valid license on July 1, 1986, unless the license holder expands the lands covered by the license.

(5) As used in this section, "flush" or "flushed" means to move or chase from the area that is to be enclosed.
